

COMPANHIA DE SANEAMENTO DO PARANÁ

CVM REGISTRY No. 01862-7

CNPJ No. 76.484.013/0001-45

NOTICE TO THE MARKET

Companhia de Saneamento do Paraná (“Sanepar”), (“Company”), in response to Official Letter No. 246/2026/CVM/SEP/GEA-2 (“Official Letter”), sent by the Brazilian Securities and Exchange Commission (*Comissão de Valores Mobiliários* – “CVM”) on October 27, 2026 (Proceeding No. 19957.017056/2026-70), which requests clarifications regarding the news published on October 23, 2026, in the newspaper *Folha de S. Paulo* under the headline “Sanepar says it has plans to operate outside Paraná” (“*Sanepar diz ter planos de atuar fora do Paraná*”), hereby provides the following clarifications:

1. On the nationwide scope strategy, potential consortia, and mention of Sabesp and Acciona

Regarding the Chief Executive Officer's statements concerning Company plans to operate on a nationwide scale through consortia and joint investments, Sanepar clarifies that this strategic guideline does not constitute a new fact or inside information. It is a matter of public knowledge that legal and statutory authorizations exist for Sanepar to operate outside the borders of the State of Paraná and to establish consortia, special purpose entities (SPEs), subsidiaries, and other forms of corporate association with third parties aimed at participating in business opportunities aligned with its corporate purpose, as expressly provided in Articles 4 and 18 of its Bylaws. Furthermore, the market had already been formally informed about the expansion of the Company's operational scope via the Notice to the Market disclosed on July 29, 2020, which addressed the enactment of State Law No. 20,266/2020.

As an example of this ongoing and widely disclosed guideline, we cite the memorandum of understanding with Acciona, which was subject to specific disclosure through a Notice to the Market on September 26, 2025.

Regarding the specific mention of Sabesp in the aforementioned news article, Sanepar clarifies that there are currently no talks, proceedings, negotiations, joint studies, or institutional overtures aimed at forming a partnership or consortium between the companies. The mention was made solely and exclusively with the purpose of exemplifying the possibility of Sanepar entering into partnerships with large and prominent companies in the sector, as well as highlighting that Sanepar has the standing to engage in dialogue with major players and does not rule out analyzing opportunities aligned with its commercial strategy. Therefore, any suggestion that there is an ongoing corporate, strategic, or commercial move involving Sabesp is dismissed.

2. On the Public Call and GS Inima

Regarding the approach with the Spanish group GS Inima for the supply of reuse water and environmental sanitation, the Company clarifies that no binding legal instrument or formal business opportunity capable of constituting materiality and requiring the disclosure of a Material Fact has been entered into, with the matter lacking, for the time being, any definitiveness.

This initiative stems from an innovative and flexible business prospection tool adopted by the Company—the "Public Call" ("*Chamamento Público*"), which is transparently and widely publicized to suppliers and interested parties on its corporate website. The procedure of this call strictly follows four procedural stages:

1. **Preparation:** review of the public notice and project structuring by interested parties;
2. **Submission:** delivery of documentation;
3. **Evaluation:** verification of qualifications and technical ranking (the stage in which GS Inima was selected);
4. **Development:** stage in which the selected proponent may formalize a memorandum of understanding and subsequently develop the opportunity.

Therefore, this constitutes an act of ordinary management in which Sanepar and GS Inima express their intent to make their best efforts to initiate talks aimed at assessing the viability of the business opportunity focused on water reuse. Being still in an embryonic stage, there is no factual basis to warrant disclosure as a Material Fact under CVM Resolution No. 44/21.

3. On the universalization targets and the carbon market

Regarding the plan to advance the universalization of sanitation to 2029 (reaching 90% sewage coverage) and potential gains in the carbon market through nitrous oxide emissions from sewage, such data constitute public information previously reported to shareholders and the market.

Information regarding the intention to anticipate universalization relative to the legal sanitation framework is already set out in detail in the 2025 Management Report, as well as in the 2025 Integrated Report. Likewise, information regarding the Company's studies on the use of sewage-derived nitrous oxide in the carbon market was clearly and extensively disclosed in the 2025 Integrated Report (page 95). This information is already included in periodic official documents filed on the *Empresas.NET* System, dispensing with the issuance of an eventual Notice to the Market.

4. On the regulatory tariff reduction rule (75% / 25%)

Regarding the statement that 75% of funds from new businesses are allocated toward tariff affordability and 25% retained by the Company, it is clarified that this is not a discretionary internal resource allocation policy, but rather strict compliance with an external regulatory mandate.

This division is a regulatory treatment rule for the allocation of proceeds from other revenues, established in a mandatory and public manner by the Paraná State Public Services Regulatory Agency (*Agência Reguladora de Serviços Públicos Delegados do Paraná – AGEPAR*). The rule is set forth in the manual for the 3rd Periodic Tariff Review, specifically in item 3.5 ("Other Revenues"). Because it is a matter of tariff regulation of broad industry knowledge, it does not constitute an extraordinary event under the scope of CVM Resolution No. 44/21.

In light of the foregoing, Sanepar reaffirms that it found no reason for the disclosure of a Material Fact regarding the topics covered in the news article, given that: (i) the strategic and financial guidelines addressed were already public knowledge through the Bylaws, periodic filings (2025 Management Report and 2025 Integrated Report), and AGEPAR regulations; (ii) there are no negotiations underway with Sabesp; and (iii) the process concerning reuse water (GS Inima) is in a preliminary stage of feasibility studies within the scope of a regular public call, not configuring an act or fact of legal or financial materiality to fall under CVM Resolution No. 44/21.

The Company reiterates its strict commitment to keeping the market duly and timely informed on matters relevant to its business.

Curitiba, October 28, 2026.

Leura Lucia Conte de Oliveira
Acting Chief Financial and Investor Relations Officer
